To Hiring Manager,

I, Anagha Kelkar, a graduate student completing Master of Science in Computer Science at University of Southern California in May 2019 with couple of years of hands-on experience in creating and implementing software applications, and the ability to troubleshoot and solve problems in a timely and accurate manner, confidently express my interest for an Internship position at your company.

My two years' experience as a Software engineer in an ecommerce company Infibeam.com have equipped me with the skills outlined in your job requirements. In my position as Software Engineer with Infibeam.com, I was involved in project research, planning, design, development and unit testing using Rspec. Through innovative thinking, I developed scalable solutions for collection of data and delivery of timely and efficient solutions also executed slow query log mechanism to improve the database performance up to 70%.

My formal academic training has also provided me with opportunities to work with many languages in the Linux and Windows environments. Working individually or as part of a team, I have successfully completed numerous programming assignments in courses such as Data Structures and Algorithms, Game Programming, Internet Programming, Operating Systems, Artificial Intelligence, Software Engineering and Object Oriented Programming Systems. My technical expertise includes fluency in scripting & programming languages (including Ruby, Java, C, C++, Python, JavaScript) and web languages (including HTML, CSS, PHP, JSP).

My resume will give you a better understanding of my qualifications. A career at your company would provide me with an ideal opportunity to hone my skills and contribute towards the organization. I look forward to hearing from you at your earliest convenience. Thank you for consideration.

Regards.

Anagha Kelkar.
